An excellent example
of something old and
something new, **199 Church**
stands out in a skyline
that's forever changing.
While modern in its design and
materiality, it incorporates the
rich past of Church Street
to fashion a structure
with a singular presence.

DESIGN

LIVE. WORK. PLAY.

Illustration is artist's concept only. Actual may vary. E. & O.E.

Retaining the historic façade of the Georgian townhouses that sit on Church Street, the podium with its punched windows in between brick pilasters, limestone lintels and cornices adds character to an otherwise contemporary building. These architectural features generate an even rhythm that brings a sense of intimacy and community along the street.

An embodiment of the site's history and character, at 39 storeys, the tower stands tall above the street, creating a dramatic overhang and an interesting architectural statement. Inspired by the materiality, aesthetic and rhythm of the podium, its facade fuses heritage charm with clean modern lines.
